And we're just getting started...

A Better Way To Smile.

About Dandy

Proudly based in the U.S.A., Dandy provides fully digital services and advanced restorative and cosmetic dental products to dentists nationwide. Each Dandy product is designed with the industry's most sophisticated technology and produced with materials designed for superior fit and performance, providing longer-lasting results.

Dandy has transformed the dental industry with our excellence, starting with restorative work, like crowns and veneers. We're doing the same with Dandy Clear Aligners – best-in-class treatment, all at a great price.

The better choice with better value and a better experience for better results.

Dentist Trusted And Expert Approved

Dandy Clear Aligners are your dentist's choice to deliver the smile you want. Dandy's team of orthodontic experts works with your dentist to create the customized treatment plan you deserve. And you'll get the expert care you want from the dentist you trust. With a few easy visits along the way, get ready to transform your smile in record time.

More Value. For Less.

We've built Dandy to make sure that our dentists are able to treat their patients with the most advanced digital technology. It all starts with the 3D scans of your teeth so your Dandy Dentist can ensure the most precise fit to limit in-person visits to when they're truly needed. And we give you all of the accessories you need to get your treatment started off right. We also provide the retainers you get post-treatment to keep that perfect smile. All at an affordable price. Just ask your dentist.

4 Easy Steps To a Better Smile

- 1 Dentist Evaluation**

Your Dandy Dentist will scan your teeth with our state-of-the-art 3D digital scanner. Goodbye goopy trays, hello smart technology.
- 2 Get Started**

Your Dandy Dentist will work with our team of orthodontic experts to design your customized treatment plan. In as little as 2 weeks, we'll deliver your aligners so you can start treatment.
- 3 Hands-On Treatment**

Your Dandy Dentist will track your progress and manage your treatment with hands-on care when it's needed, every step of the way.
- 4 Say Cheese**

You'll have the beautiful smile you've been dreaming about as soon as possible. Who knows, you might just feel like showing off. Like it says on the box, "it's all smiles from here on out."

Confident Smiles For Every Occasion

At Dandy, we understand how straighter teeth can transform a smile – giving you newfound confidence in all you do. Dandy Clear Aligners are the best choice if you're looking for an alternative to the "do-it-yourself" mail-order experience with the goopy trays, or the discomfort and inconvenience of metal braces.

Whether you're planning for that special event, starting a new job, or just want to feel better about your smile, Dandy Clear Aligners are the better way to take your confidence to the next level. Smile confidently – it's the Dandy way.

Dandy Clear Aligners aren't just beautiful—they feel better, fit better, and perform better.

Superior Fit. Great Results.

Dandy Clear Aligners aren't just crystal clear – they feel better, fit better, and perform better. It all starts with the digital scan – no more putty! Our innovative triple-layer elastic plastic hugs the teeth tighter, providing greater comfort and more accurate tooth movement. With your Dandy Dentist, you'll need fewer visits and enjoy a more predictable treatment timeline.

Quality Meets Durability

Dandy Clear Aligners are built for performance using the industry's most advanced triple-layer elastic plastic: our aligners are like a performance sandwich. The durable, crack-resistant, stain-resistant outer layers grip and protect the teeth, while the middle elastic layer moves your teeth using gentle and consistent force so you barely notice them at all. Did we mention they're crystal clear? And made for living!
